DETAILED ACTION

The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit **1631**.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

- I. Claims 1-11, 13-18, and 25-26, drawn to a crystal of CD40 ligand and methods of preparing, and a method of using the crystal for structure.
- II. Claims 12, drawn to a machine readable storage medium storing crystallographic coordinate data.
- III. Claims 19, and 28-34, drawn to a method of identifying a compound that associates with TNF- α converting enzyme polypeptide. If this group is elected, a species election is required.
- IV. Claims 20-24 and 35-36, drawn to a chemical entity that associates with CD40 ligand or CD40, or a fragment complex or homolog thereof.
- V. Claims 27, drawn to a method of using the structural coordinates in structure determination.

SPECIES REQUIREMENT

For Group III, applicant must elect a species method for evaluating association with CD40 ligand: (A) computational, (B) experimental.

Each of the methods require differing apparatus, method steps, and criteria for evaluating association which are physically and conceptually distinct methods.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I possesses the inventive concept of being drawn to a crystal of CD40 ligand, methods of preparing the crystal, and the method of using the crystal for structure determination. The crystal, methods of making and using are not encompassed or required by the claims of Groups II-V.

Group II possesses the inventive concept of being drawn to a computer readable medium. The inventive concept is not related to Groups I or III-V.

Group III possesses the inventive concept of being drawn to a method of designing a ligand. The method steps and parameters used are not shared or required by Groups I, II, IV, or V.

Group IV possesses the inventive concept of being drawn to a chemical entity that associates with CD40 ligand. The chemical entity is not shared by the claims of Groups I-III or V.

Group V possesses the inventive concept of being drawn to a method of using the structural coordinates of CD40 ligand for structure determination. The method steps and results of Group V are not encompassed or shared by the claims of Group I-IV.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nancy Ogihara whose telephone number is (703) 308-9363. The examiner can be reached Monday-Friday from 8:30-6:00. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor Michael Woodward can be reached at (703) 308-4028.
